**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

5 1.-32. (Canceled)

33. (Currently Amended) A method comprising:  
using a camera to capture at least one image;  
using said camera to capture information associated with said image,  
wherein said information is stored in a database; and  
10 using said information to generate a physical label having an  
identifier, wherein the label is adapted to be affixed to a storage device that  
is adapted to hold printed copies of the plurality of images.

34. (Previously Presented) The method of claim 33 wherein said  
image is a digital image, further comprising:  
15 storing each image of the plurality of images in said database.

35. (Previously Presented) The method of claim 33, wherein  
capturing said information comprises:  
forming metadata during said capture of said image.

36. (Previously Presented) The method of claim 33, wherein  
20 capturing said information comprises:  
accepting said information from a user.

37. (Previously Presented) The method of claim 33 wherein the information is at least one of:

GPS coordinates;  
a time;  
5 a date;  
camera information;  
an audio file;  
at least one keyword;  
a description of subject matter of the image; and  
10 an event associated with the image.

38. (Previously Presented) The method of claim 33 wherein the storage device is selected from the group consisting of:

an envelope;  
an album; and  
15 a box.

39. (Previously Presented) The method of claim 33, further comprising:

forming at least a portion of the plurality of images by a digital camera.

20 40. (Previously Presented) The method of claim 33, further comprising:

forming at least a portion of the plurality of images by a non-digital camera; and  
converting the at least a portion of the plurality of images into digital  
25 form.

41. (Previously Presented) The method of claim 33, further comprising:

placing the label on the storage device; and  
placing printed copies of the plurality of images in the storage device.

42. (Previously Presented) The method of claim 33, further comprising:

searching the database with a query to locate a printed copy of one image of the plurality of images;

- 5        providing the identifier associated with the one image;  
      locating the storage container with the label having the identifier;  
      searching the storage container for the printed copy of the one image.

43. (Previously Presented) The method of claim 42 wherein the query comprises at least one of:

- 10        GPS coordinates;  
      a time;  
      a date;  
      camera information;  
      an audio file;  
15        at least one keyword;  
      a description of subject matter of the one image; and  
      an event associated with the one image.

44. (Previously Presented) The method of claim 33 further comprising:

- 20        forming a thumbnail representation of the image on the label.

45. (Previously Presented) The method of claim 44, further comprising:

- searching the database with a query to locate the printed copy of the image; and  
25        providing the thumbnail representation of the image.

46. (Withdrawn) A system comprising:  
a storage container that holds printed copies of a plurality of images;  
a printer that provides a label having an Identifier, wherein the label is  
affixed to the storage container; and

5 a database for holding information associated with at least one image  
of the plurality of Images, and associates each of the images of the plurality  
of images with the Identifier.

47. (Withdrawn) The system of claim 46, wherein the database  
also stores each image of the plurality of images.

10 48. (Withdrawn) The system of claim 46, wherein the information  
is at least one of:

GPS coordinates;  
a time;  
a date;  
15 camera information;  
an audio file;  
at least one keyword;  
a description of subject matter of the image; and  
an event associated with the image.

20 49. (Withdrawn) The system of claim 46, wherein the storage  
device is selected from the group consisting of:

an envelope;  
an album; and  
a box.

50. (Withdrawn) A system for storing a printed copy of an image, comprising:

means for providing information associated with the image;

means for storing a printed copy of the image;

5 means for generating a label having an identifier, wherein the label is adapted to be affixed to the means for storing; and

means for storing the information and for associating the identifier with the image.

51. (Withdrawn) The system of claim 50, wherein the information  
10 is at least one of:

GPS coordinates;

a time;

a date;

camera information;

15 an audio file;

at least one keyword;

a description of subject matter of the image; and

an event associated with the image.

52. (Withdrawn) The system of claim 51, further comprising:

20 means for searching the means for storing the information and for associating the identifier with the image to locate the means for storing a printed copy of the image via the identifier;

wherein the means for searching uses a query that includes at least a portion of the information.

53. (Currently Amended) A method comprising:  
generating information identifying an image at the time said image is  
captured;

5 automatically producing meta-data associated with said image;  
providing the meta-data into a database;  
generating a physical label that is adapted to be affixed to a storage  
device adapted to hold a printed copy of said image, wherein said label has  
an identifier generated from said identifying information; and  
providing said identifier into said database.

10 54. (Previously Presented) The method of claim 53 wherein said  
identifying information is automatically generated by a device capturing said  
image.

55. (Previously Presented) The method of claim 53 further  
comprising:  
15 providing a thumbnail representation of the image into the database;  
and  
printing the thumbnail representation on the label.

56. (Previously Presented) The method of claim 53 wherein the  
meta-data includes global position system (GPS) coordinates acquired at a  
20 time when the image is produced.

57. (Previously Presented) The method of claim 53 further  
comprising:  
searching for the image in the database by submitting a query to the  
database, wherein the query includes criteria associated with the meta-data.

25 58. (Previously Presented) The method of claim 57 further  
comprising:  
displaying a thumbnail representation of the image upon matching the  
query to the image in the database.

59. (Previously Presented) A method comprising:  
capturing a plurality of images with a digital camera;  
inputting, from a user into said digital camera, user data associated  
with each said image;

5 automatically generating, with said digital camera, meta-data  
associated with each said image, wherein said meta-data comprises said  
user data, and wherein said meta-data for each said image is generated at a  
time said image is captured;

10 providing each said image and its associated meta-data into a  
computer; and  
generating a label to affix to a storage device for holding a printed  
copy of said images, wherein said label identifies said printed copies with an  
identifier image generated from said meta-data.

60. (Previously Presented) The method of claim 59 further  
15 comprising:  
generating a thumbnail of said image on said label.

61. (Previously Presented) The method of claim 59 further  
comprising:  
organizing said images on said computer using said meta-data.

20 62. (Previously Presented) The method of claim 59 further  
comprising:  
automatically creating, with said computer, said identifier.

63. (Previously Presented) The method of claim 59 further  
comprising:  
25 storing, in said computer, said meta-data, said user data, and said  
identifier.
